ACTION

WO 03/020814 A1

(54) Title: LIQUID BENZOATE ESTER COMPOSITIONS AND AQUEOUS POLYMER COMPOSITIONS CONTAINING THE SAME AS PLASTICIZERS

(57) Abstract: The addition of at least 20 weight percent of a specified class of monobenzoates to a dibenzoate that freeze at 28° C. or above results in a mixture that is both a liquid at this temperature and an unexpectedly effective plasticizer for many organic polymers. The plasticized polymer compositions are useful in various end use applications including adhesives and caulks.
