

Abstract**An aroma product comprising flavoring compounds**

5

The invention concerns an aroma product comprising flavoring compounds , obtainable through a process comprising :

- 10 - dissolving in water amino acids, peptides or hydrolyzed proteins and reducing sugars or dissolving in water aroma precursors,
- introducing in said solution an edible surfactant taken in the group consisting of a monoglyceride and a
- 15 phospholipid,
- heating the obtained mixture to have a mesomorphic phase structure or a microemulsion,
- maintaining said heating to develop flavoring compounds
- and cooling said mixture.
