(54) Title: THERAPEUTIC PYRAZOLOQUINOLINE UREA DERIVATIVES

(57) Abstract: The invention provides a novel chemical series of formula I, as well as methods of use thereof for binding to the benzodiazepine site of the GABA_A receptor and modulating GABA_A, and use of the compound of formula I in the manufacture of a medicament for the treatment of GABA_A receptor associated disorders. The invention further provides a method of modulation of one or more GABA_A subtypes in an animal comprising administering to the animal an effective amount of a compound of formula (I).
