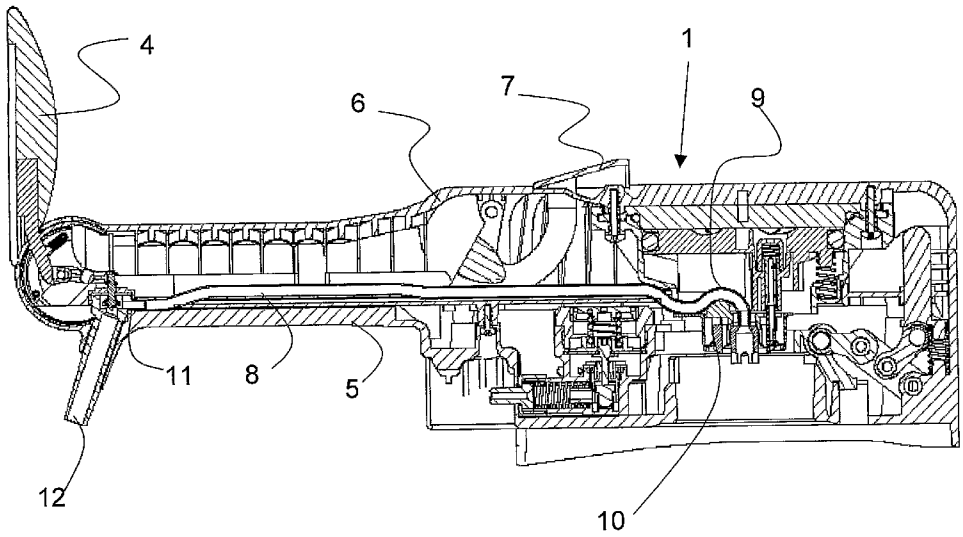
(54) **Title:** A DISPENSING LINE FOR A DISPENSING SYSTEM



(57) **Abstract:** The present invention relates to a dispensing line (8) for a dispensing system to be used in connection with dispensing of a beverage. Said system comprising a beverage container (2), said container comprising an outlet wherein an extractor tube (20) is arranged, and a dispensing device (1) adapted to connect a pressure medium, such as $CO_2$, to the container so that the beverage present in the container is forced out of the container via the extractor tube. The dispensing line further comprises a connection means (10) for attachment to the extractor tube (20), said connection means (10) comprises a non-reattachment means (15-35), which is adapted to disengage the connection when the dispensing line is detached from the extractor tube, so that the dispensing line cannot be reused.
