(54) Title: HOST COMPUTING DEVICES CONTROL COMPONENT STATUS DISPLAY

Fig. 1.

(57) Abstract: Systems and methods are disclosed which facilitate the management of host computing devices through the utilization of a host computing device control component. The host computing device control component includes a state monitoring component that monitors operating states of the control component. Based on monitoring the operating of the control component, the state monitoring component causes the generation of one or more visual indicator indicative of the operating state of the control component.
