

ABSTRACT

To provide a presentation assistance device that can display keywords related to presentation materials and call attention by displaying an alert when words that are forbidden to speak are spoken. A presentation assistance device 1 comprises: a presentation material storage means 3; a keyword storage means 5 which stores a plurality of keywords related to presentation materials; a related word storage means 7 which stores one or a plurality of related words for each of the plurality of keywords; an NG word storage means 9 which stores one or a plurality of NG words for each of the plurality of keywords; a voice recognition means 11; a term determination means 15 which determines whether a voice recognition term corresponds to a related word or an NG word; and a keyword output means 17 which when the voice recognition term is a related word, outputs a keyword related to the related word, and when the voice recognition term is an NG word, outputs an alert and a keyword related to the NG word.
