(54) **Title:** CONTAINER COMPACTION

(57) **Abstract:** In a method of compacting waste (W), wherein waste is introduced into a generally box shaped elongated waste container (3) through at least one waste inlet (5) thereof and is collected in the waste container (3) at a waste collection station (4), the container is positioned with a generally rectangular bottom wall (3 A) thereof on an inclined surface (7) of the waste collection station, thereby tilting the container and its bottom wall, and releasably securing the container in the tilted position. A waste collection facility (13) of the waste collection station (4) is also provided.
