

Abstract

Theater seating systems, theater lounge seats, theater seats, and theater seating arrangements are described herein. An example embodiment of a theater seating system comprises a separating panel and a theater seat. The separating panel has a first end, a second end, a first section, a second section, a third section, and a fourth section. The first section, the second section, the third section, and the fourth section cooperatively define a chamber within which the theater seat is disposed. The first end is separated from the second end to define an opening that provides access to the chamber defined by the separating panel.
