(54) Title: AIRCRAFT PASSENGER SEAT WITH A DISPLAY MONITOR INCLUDING A READING LIGHT

(57) Abstract: A personalised reading light (11) for aircraft passenger seats (3) is disclosed. The reading light forms part of a personalised visual display monitor assembly (5) that is mounted to a back (7) of a passenger seat. The reading light is mounted to direct light rearwardly into a space immediately in front of a passenger facing the seat back. In one embodiment the assembly is adjustable in relation to the seat back and the reading light is adjustable in relation to other components of the assembly. Consequently, the direction of the light can be varied considerably.
