IV INJECTION AND SAMPLING SITE HAVING SEPTUM WITH MULTIPLE OPENINGS

ABSTRACT OF THE DISCLOSURE

A reliable, leak-resistant site (20) for the introduction of blunt or sharp penetrators. The site (20) includes an elastomeric septum (26; 126) through which multiple openings (48; 148) are formed in the axial direction. The septum (26; 126) is inserted within a housing (24) having a passageway (30) defining an axial direction.
