(54) Title: ELECTROLYTIC CELLS WITH RENEWABLE ELECTRODE STRUCTURES AND METHOD FOR SUBSTITUTING THE SAME

(57) Abstract: The invention is relative to an electrolytic cell comprising electrodes spaced apart from the back-wall (1) by means of ribs (3), wherein a portion of the contact surface between the electrodes (2) and the ribs (3) is free from constraints in order to permit the complete removal of the electrodes once they have to be replaced by removing only partially the original contact surface, so that positioning of the substitute electrodes is allowed on the residual portion. A method for substituting the electrodes of the cell which leaves the distance between the electrode surface and the back-wall unvaried is also disclosed.
