

COMMUNICATION METHOD AND APPARATUS, AND COMPUTER-READABLE STORAGE MEDIUM

ABSTRACT

Embodiments of the present invention disclose a communication method and apparatus, and
5 a computer-readable storage medium. The method includes: An environment controller sends
location information and a state pattern to a control board via an access network device. The
control board adjusts a location and a state of the control board based on the location information
and the state pattern. In embodiments of the present invention, a propagation environment of
surrounding space may be optimized by adjusting the location and the state of the control board,
10 to improve a throughput of a communication system.
