(54) Title: NEIGHBORING CELL MEASUREMENT METHOD AND APPARATUS, AND DEVICE AND STORAGE MEDIUM

(54) 发明名称: 邻小区测量方法、装置、设备及存储介质

图 2

AA Terminal
BB Network device
CC Step 201: the network device sends configuration information to the terminal, wherein the configuration information comprises at least one piece of reference point information and a distance threshold corresponding to each piece of reference point information, and each piece of reference point information and/or the distance threshold corresponding to each piece of reference point information are/is associated with at least one frequency
DD Step 202: the terminal receives the configuration information, which is sent by the network device, wherein the configuration information comprises the at least one piece of reference point information and the distance threshold corresponding to each piece of reference point information, and each piece of reference point information and/or the distance threshold corresponding to each piece of reference point information are/is associated with the at least one frequency
EE Step 203: the terminal performs neighboring cell measurement on the basis of the at least one piece of reference point information and the distance threshold corresponding to each piece of reference point information

(57) Abstract: The present application belongs to the field of mobile communications. Disclosed are a neighboring cell measurement method and apparatus, and a device and a storage medium. The method comprises: a terminal receiving configuration information, which is sent by a network device, wherein the configuration information comprises at least one piece of reference point information and a distance threshold corresponding to each piece of reference point information, and each piece of reference point information and/or the distance threshold corresponding to each piece of reference point information are/is associated with at least one frequency (step 202); and performing neighboring cell measurement on the basis of the at least one piece of reference point information and the distance threshold corresponding to each piece of reference point information (step 203). By means of the neighboring cell measurement method provided in the present application, neighboring cell measurement is guaranteed, and cell measurement is performed on the basis of reference point information and a distance threshold corresponding to the reference point information, such that the accuracy of cell measurement is improved.

(57) 摘要: 本申请公开了一种邻小区测量方法、装置、设备及存储介质, 属于移动通信领域。该方法包括: 终端接收网络设备发送的配置信息, 配置信息包括至少一个参考点信息和每个参考点信息对应的距离门限, 每个参考点信息和/或每个参考点信息对应的距离门限与至少一个频率关联 (步骤 202); 基于至少一个参考点信息和每个参考点信息对应的距离门限, 进行邻小区测量 (步骤 203)。本申请提供了一种邻小区测量的方式, 保证了邻小区的测量, 并且基于参考点信息以及参考点信息对应的距离门限来进行小区测量, 提高了小区测量的准确性。
