(54) Title: SOFT TISSUE PAPER HAVING A SOFTENING COMPOSITION CONTAINING AN ELECTROLYTE DEPOSITED THEREON		
(57) Abstract Disclosed is a composition for softening an absorbent tissue and tissue structures softened using the composition. The composition includes an effective amount of a softening active ingredient; a vehicle in which the softening active ingredient is dispersed; and an electrolyte dissolved in the vehicle. The electrolyte causes the viscosity of the composition to be less than the viscosity of a dispersion of the softening active ingredient in the vehicle alone. Preferably, the softening active ingredient is a quaternary ammonium compound with the formula: $(R_1)_{4-m} - N^+ - [(CH_2)_n - Y - R_3]_m X^-$, the vehicle is water, and the electrolyte is calcium chloride.
