(54) Title: METHOD AND SYSTEM FOR ASSET TRANSITION PROJECT MANAGEMENT

(57) Abstract: The method and system of the present invention provides an improved method for asset transition project management. Information is aggregated from a variety of sources into a centralized computerized database (101). Thereafter, assets that are electronically connected to the computerized database are monitored (102). If a transition occurs, information concerning the transition (103) is input into the computerized database on a realtime basis during the implementation of the transition. The information input into the computerized database can be used to manage the transition (104).
