

FUEL GAS SUPPLY SYSTEM OF SHIP

[ABSTRACT]

Disclosed herein is a fuel gas supply system (FGSS) of a ship supplying natural gas to an engine as fuel. The fuel gas supply system of a ship may include: a cargo tank storing a liquid cargo; a vent mast connected to the cargo tank; a fuel supply line connected to the engine to supply fuel; and a vent line connected to the fuel supply line, in which the vent line may be connected to the vent mast.
