

ABSTRACT

The present disclosure may be directed to systems and methods for managing and monitoring services and modules. The system may include receiving, from a user device, a request to perform a test on a target application programming interface; calling the target application programming interface; and retrieving a search result page associated with the target application programming interface. The system may include retrieving a rule based on the target application programming interface and applying the rule to the retrieved search result page associated with the target application programming interface. The system may include determining whether to implement the target application programming interface based on the results of the applied rule.
