210 Acquire a configuration information set for a target merchant;
220 When running a built-in universal code of an interactive device, display a service home page according to the configuration information set
230 In response to an information acquisition prompt of the service home page, acquire target biological information of a target object by means of an acquisition apparatus of the interactive device
240 When a biometric identification service is not activated for a target object account, in response to an authorization activation operation from a target user terminal, display a service activation page

(57) Abstract: The present application discloses a service processing method, a related apparatus, a device and a storage medium. The method of the present application comprises: acquiring a configuration information set for a target merchant; when running a built-in universal code of an interactive device, displaying a service home page according to the configuration information set, wherein the built-in universal code is a code written by a device producer; in response to an information acquisition prompt of the service home page, acquiring target biological information of a target object by means of an acquisition apparatus of the interactive device; and when a biometric identification service is not activated for a target object account, in response to an authorization activation operation from a target user terminal, displaying a service activation page. The present application does not require a lot of time and manpower to develop service codes, thereby reducing the development cost, and improving the development efficiency and code maintainability.

(57) 摘要: 本申请公开了一种业务处理的方法、相关装置、设备以及存储介质。本申请方法包括: 获
取针对于目标商户的配置信息集合; 当运行交互设备的内置通用代码时, 根据配置信息集合显示业
务主页面, 其中, 内置通用代码为设备生产方写入的代码; 响应于业务主页面的信息采集提示, 通
过交互设备的采集装置, 获取目标对象的目标生物信息; 在目标对象账号未开通生物识别业务的情
况下, 响应于来自目标用户终端的授权开通操作, 显示业务开通页面。本申请无需花费大量时间和
人力进行业务代码的开发, 从而降低开发成本, 提升开发效率和代码可维护性。
