(54) Title: APPARATUS, SYSTEM AND METHOD FOR TRANSPORTING WATER

FIG. 1

(57) Abstract: The embodiments of the present disclosure relate to an apparatus, a system and a method for collecting, transporting and delivering water. Some embodiments relate to a vessel for transporting water, the vessel comprising an outer wall for defining an internal plenum for receiving the water, the outer wall also defining a front end, a back end and a bulkhead port therebetween for providing fluid communication across the outer wall; a propulsion system that is configured to move the vessel; an power system supported upon the outer wall that is configured to capture energy and power the propulsion system; and an anti-roll and buoyancy system that is positioned about the outer wall and below the power system. Other embodiments relate to a pumping system that may be used with the vessel described herein, as a system that can perform the methods described herein.
