— without international search report and to be republished upon receipt of that report (Rule 48.2(g))

(54) Title: CONSTRUCTION PANEL AND MANUFACTURE THEREOF

(57) Abstract: A panel for use in building construction comprises a substrate board having two opposed faces. A lamina is secured to a first one of the faces of the substrate board by means of one or more regions of bonding between the lamina and the board. The one or more regions of bonding cover a total area that is less than 20% of the total interfacial area between the lamina and the board.
