(54) Title: SYSTEM AND METHOD FOR TESTING MULTIPLE PACKET DATA TRANSMITTERS

FIG. 3A

(57) Abstract: A system and method for testing a plurality of packet data transmitters in which multiple devices-under-test (DUTs) are tested by providing similar transmit data streams to the DUTs each of which, in response thereto, provides a respective packet data signal. At least a portion of each packet data signal is captured to provide captured data packets, which are processed to provide multiple sets of test data respective ones of which, in turn, are analyzed in view of the transmit data to determine an operational status of each DUT.
