

[Abstract]

The composition for treating skin aging or skin wounds according to the present invention comprises a peptide consisting of the amino acid sequence of General Formula 1 below: K-Y-R1-R2-R3-R4-R5-R6-R7-R8 (General Formula 1). In General Formula 1 above, R1 is arginine (R), lysine (K), or glutamine (Q); R2 is arginine (R) or glutamine (Q); R3, R4, and R5 are each arginine (R) or lysine (K); R6 is asparagine (N) or serine (S); and R7 and R8 are lysine (K) or tyrosine (Y).
