Marked Up Copy

What is claimed is:

1. A lubricating ~~liquid antioxidant~~ composition ~~for lubricating oils, formed by blending the following components:~~comprising at least 90% by weight of a lubricant base, and a liquid antioxidant composition comprising the components, set forth as weight % of the lubricating composition:

(1) solid alkylated-phenyl-α-naphthylamine at 0.01-1.0%,

(2) an alkylated diphenylamine derivative of triazole, tolutriazole or benzotriazole, at 0.01-0.50%, and

(3) methylenebis(di-n-butyldithiocarbamate), at 0.01-1.0%

~~wherein each component is blended at the following weight ratios (1):(2):(3) being about 1-13:1-13:1-13.~~

2. The lubricating composition of claim 1, ~~wherein each component is present at the following weight ratios (1):(2):(3) being about 1-8:1-8:1-8.~~comprising:

(1) the solid alkylated-phenyl-α-naphthylamine at 0.10-0.50%,

(2) the alkylated diphenylamine derivative of triazole, tolutriazole or benzotriazole, at 0.01-0.30%, and

(3) the methylenebis(di-n-butyldithiocarbamate), at 0.10-0.05%

3. The lubricating composition of claim ~~2~~1, ~~wherein each component is present at the following weight ratios (1):(2):(3) being about 1-2:0.125-1:1-2.~~comprising:

(1) the solid alkylated-phenyl-α-naphthylamine at 0.15-0.30%,

(2) the alkylated diphenylamine derivative of triazole, tolutriazole or benzotriazole, at 0.01-0.15%, and

(3) the methylenebis(di-n-butyldithiocarbamate), at 0.15-0.30%

4. The lubricating composition of claim 1, ~~wherein component (1) is octylated phenyl-α-naphthylamine, and component (2) is octylated diphenylamine derivative of tolutriazole.~~comprising:

Marked Up Copy

(1) the solid alkylated-phenyl-α-naphthylamine at 0.05-0.25%,

(2) the alkylated diphenylamine derivative of triazole, tolutriazole or benzotriazole, at 0.025-0.15%, and

(3) the methylenebis(di-n-butyldithiocarbamate), at 0.10-0.30%

5. The~~A~~ lubricating composition ~~comprising at least 90% by weight of a lubricant base, and a liquid antioxidant composition comprising the components, set forth as weight % of the lubricating composition:~~of any of the preceding claims, wherein component (1) is octylated phenyl-α-naphthylamine, and component (2) is octylated diphenylamine derivative of tolutriazole

~~(1) solid alkylated phenyl-α-naphthylamine at 0.01-1.0%,~~

~~(2) an alkylated diphenylamine derivative of triazole, tolutriazole or benzotriazole, at 0.01-0.50%, and~~

~~(3) methylenebis(di-n-butyldithiocarbamate), at 0.01-1.0%.~~

6. The lubricating composition ~~of claim 5, comprising:~~of any of the preceding claims, wherein the lubricant base is chosen from one of a grease, turbine oil, compressor oil, industrial lubricating oil and engine lubricating oil.

~~(1) solid alkylated-phenyl- α -naphthylamine at 0.10-0.50%,~~

~~(2) an alkylated diphenylamine derivative of triazole, tolutriazole or benzotriazole, at 0.01-0.30%and~~

~~(3) methylenebis(di-n-butyldithiocarbamate), at 0.10-0.50%~~

7. The lubricating composition of claim 6, wherein the lubricant base is a grease or turbine oil~~comprising:~~

~~(1) solid alkylated-phenyl-α-naphthylamine at 0.15-0.30%,~~

~~(2) an alkylated diphenylamine derivative of triazole, tolutriazole or benzotriazole, at 0.01-0.15%, and~~

Marked Up Copy

~~(3) methylenebis(di-n-butyldithiocarbamate), at 0.15-0.30%.~~

8. The lubricating composition of ~~claim 5, wherein component (1) is octylated phenyl-α-napthylamine, and component (2) is octylated diphenylamine derivative of tolutriazole.~~any of the preceding claims, further comprising one or more additives selected from dispersants, detergents, friction modifiers, corrosion inhibitors, rust inhibitors, anti-wear additives, pour point depressants, viscosity index modifiers, supplemental antioxidants and extreme pressure additives

9. The lubricating composition of claim ~~6~~8, where the supplemental antioxidants are selected from alkylated diphenylamine antioxidants and hindered phenolic antioxidants.~~wherein component (1) is octylated phenyl-α-napthylamine, and component (2) is octylated diphenylamine derivative of tolutriazole.~~

10. ~~The lubricating composition of claim 7, wherein component (1) is octylated phenyl-α-napthylamine, and component (2) is octylated diphenylamine derivative of tolutriazole.~~

~~11. The lubricating composition of claim 5, wherein the lubricant base is chosen from one of a grease, turbine oil, compressor oil, industrial lubricating oil and engine lubricating oil.~~

~~12. The lubricating composition of claim 11, wherein the lubricant base is a grease or turbine oil.~~

~~13. The lubricating composition of claim 5, further comprising one or more additives selected from dispersants, detergents, friction modifiers, corrosion inhibitors, rust inhibitors, anti-wear additives, pour point depressants, viscosity index modifiers, supplemental antioxidants and extreme pressure additives.~~
