(54) Title: PORTABLE ELECTRONIC APPARATUS

(57) Abstract

A charge coupled device camera (7) is incorporated into one wing (2) of a portable personal computer (1). A document (16), such as a business card, is placed on the other wing (3), secured by means of clips (15a, 15b, 15c, 15d) or transparent ribbons (125a, 125b, 125c, 125d) and photographed. Blurring of the captured image is reduced because the camera and the document are mounted to the same substrate. Also, optimal positioning of the document is achieved more quickly and easily using this arrangement than using a separate stand to mount the document.
