(54) Title: IMPROVED SCALABLE ARCHITECTURE OF SERVERS PROVIDING ACCESS TO DATA CONTENT

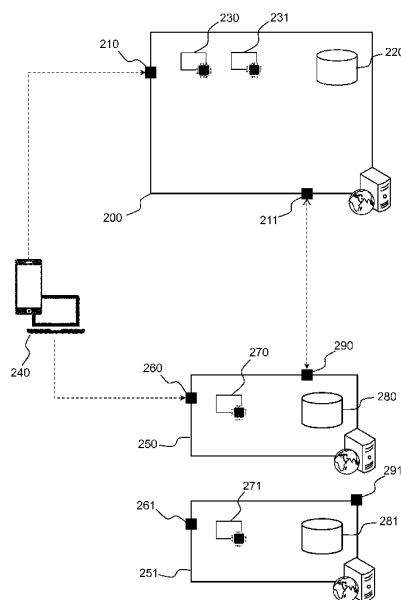

FIG. 2

(57) Abstract: The invention relates to access to resources and data manage-
ment by servers. In order to provide to users a universal access point to an ap-
plication, while allowing a strict control of the ownership and localization of
data, a first device receives from a user a request to access a resource, and, if
the user has the right to access a resource, sends to the user an identifier of a
communication endpoint of a second device, among a plurality of second de-
vices, that is able to access the resource and deliver the resource to the client.
