(54) Title: METHOD TO STREAM COMPRESSED DIGITAL AUDIO OVER CIRCUIT SWITCHED, VOICE NETWORKS

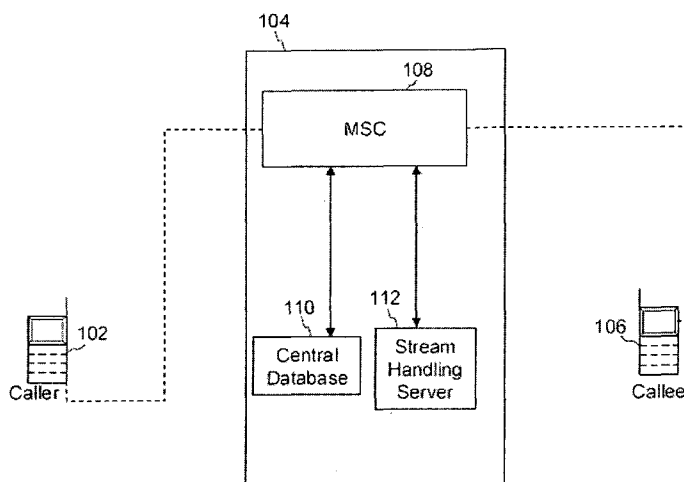

FIG. 1

(57) Abstract: A system and a method for streaming audio data to a plurality of callers in a telecommunication system have been disclosed. The system facilitates streaming of audio data to a plurality of callers by establishing a single connection with an audio data publisher. The system receives the audio data from the audio data publisher over the internet or a similar network and streams the audio data to a plurality of callers over a telecommunication network. The audio data can be streamed to a caller as a ring-back tone of a callee.
