CLAIMS

What is claimed is:

1. A pharmaceutical composition for chronic wound healing, comprising the following three components: (1) an anti-inflammatory agent which is acteoside, (2) an astringent which is a subgallic acid or a salt thereof , and (3) a cooling agent which is borneol, and optionally combined with one or more pharmaceutically acceptable carriers; wherein an equivalent ratio of the three components (1) the anti-inflammatory agent: (2) the astringent: (3) the cooling agent is 1:0.1-10:0.1-10.

2. The pharmaceutical composition of claim 1, wherein the chronic wound is a diabetic wound.

3. The pharmaceutical composition of claim 1, wherein the equivalent ratio of the three components (1) the anti-inflammatory agent: (2) the astringent: (3) the cooling agent is 1:0.5-5:0.5-5.

4. The pharmaceutical composition of claim 1, wherein the salt is a bismuth salt.

5. The pharmaceutical composition of claim 1, wherein three components of the pharmaceutical composition are (1) acteoside, (2) bismuth subgallate, and (3)borneol.

6. The pharmaceutical composition of claim 5, comprising (1) 0.05%-10% of acteoside, (2) 0.05%-10% of bismuth subgallate, (3) 0.02%-5% of borneol by weight and the pharmaceutically acceptable carrier.

7. The pharmaceutical composition of claim 6, comprising (1) 0.1%-5% of acteoside, (2) 0.06%-6% of bismuth subgallate, (3) 0.03%-3% of borneol by weight and the pharmaceutically acceptable carrier.

8. The pharmaceutical composition of claim 7, comprising (1) 0.3%-5% of acteoside, (2) 0.5%-5% of bismuth subgallate, (3) 0.5%-1% of borneol by weight and the pharmaceutically acceptable carrier.

9. Use of a pharmaceutical composition according to any of claims 1 to 8 in the preparation of a medicament for treating a chronic wound.

10. The use of claim 9, wherein the chronic wound is a diabetic wound.

11. The pharmaceutical composition of claim 1, further comprising a suitable excipient for the preparation of an external pharmaceutical form, a cosmetic form or a medicinal material form.
