(54) **Title:** A CARRYING PULL-THROUGH CROSS BOND

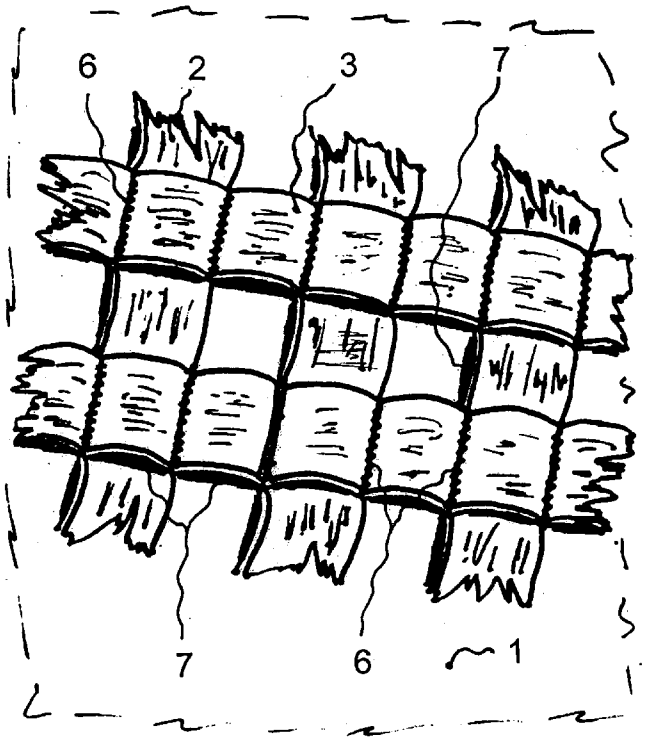

Fig. 1

(57) **Abstract:** A carrying pull-through cross bond comprising of at least two parallel longitudinal straps (2) and at least two transversal straps (3), which are arranged on one mutual plane, most frequently perpendicularly in such a way that they partly overlap each other and are attached to the carrier (1) with connection sutures (6) and linking tunnels (7) are formed between the connection sutures (6). The connection sutures (6) are arranged on the lines of the sides of the lower covered longitudinal strap (2) in such a way that they hold both the longitudinal (2) and the transversal strap (3). The gap between the longitudinal straps (2) as well as the transversal strap (3) principally has the same width as the width of the straps (2, 3).
