(54) Title: CRYOPRESERVED ENDOTHELIAL CELL COMPOSITIONS

(57) Abstract: The present invention provides compositions comprising high densities of endothelial cells (such as human umbili-
cal vein endothelial cells) in freezing media, methods of producing such compositions, and methods of using such compositions in
the preparation of therapeutic endothelial cell compositions. Such compositions and methods provide numerous advantages including
eliminating the requirement to remove cryopreservatives before administration of therapeutic endothelial cell compositions to human
subjects and requiring minimal manipulations and human interventions before use in therapeutic methods.
