

ABSTRACT

Provided are an epoxy resin containing, as a main component, a compound represented by the following formula (1) in a content of from 70 to 95% (in terms of an area% according to the gel permeation chromatography); and a curable epoxy resin composition containing the epoxy resin and a curing agent or a curing catalyst.

(1)

(In the formula, each of plurally existent Rs independently represents a hydrogen atom, an alkyl group having from 1 to 6 carbon atoms, or an alkoxy group having from 1 to 6 carbon atoms.)
