ABSTRACT

FACTOR VIII-Fc CHIMERIC AND HYBRID POLYPEPTIDES, AND METHODS OF USE THEREOF

Provided are compositions for use in decreasing the incidence of a bleeding episode in a human subject, maintaining homeostasis of a level of Factor VIII in a human subject in need of a surgery, and/or prophylactically treating hemophilia A in a human subject, wherein the compositions comprise a chimeric polypeptide comprising a functional Factor VIII (FVIII) portion having coagulant activity and a Fc portion.
