(54) Title: SMOKING ARTICLE WITH COLOUR CHANGE SEGMENT

FIG. 3

(57) Abstract: The present invention relates to a smoking article (9) comprising a mouthpiece (1), a colour change segment and a rupturable, fluid- containing capsule (5). The colour change segment is adapted to interact with the fluid from the rupturable flu- id-containing capsule such that, upon interaction, the colour change segment shows a colour change when the capsule is ruptured. The smoking article comprises a permeable outer wrapper which is in a first region covered with an impermeable coating such that the first region is impermeable, wherein a second region, which is not covered by the impermeable coating, is permeable.
