(54) Title: GAS BURNER HAVING MEANS FOR REVERSIBLY FIXING THE COVER

(57) Abstract: Gas burner (1) for a cooking hob (14) comprising: a burner cup (2) constrained to the cooking hob, onto which at least one burner body (3) is mounted, and at least one superior cover (5), which can be removably coupled to said burner body, as well as at least one annular flame diffuser (4), designed to produce at least one flame crown. The burner is also provided with means (9, 9', 10) for reversibly fixing the superior cover to the burner cup. The reversibly fixing means comprise at least one male part (9, 9') integral to the cup and at least one female part (10) integral to the cover, or vice-versa, in which the male part can be inserted into the female part and is movable within the female part between at least one reciprocal holding position and at least one reciprocal release position.
