(54) Title: A MULTILAYER PROTECTION BOARD FOR CONCRETE STRUCTURES

FIG. 1

(57) Abstract: The invention relates to a multilayer protection board for waterproofing and/or protection of a concrete structure, wherein the concrete structure is a below ground concrete structure. The multilayer protection board comprising a base layer, and an adhesive layer laminated on a first surface of the base layer, wherein the adhesive layer adheres to poured concrete during casting of structures. A second surface of the base layer is made to attach to a waterproofing membrane of the concrete structure. The waterproofing membrane is a primary protective layer and the multilayer protection board is secondary protective layer for the waterproofing membrane and/or protection of the concrete structure. The adhesive layer optionally is surfaced with at least one filler material layer. The adhesive layer optionally comprises a releasable sheet removably attached to an outwardly facing surface of the adhesive layer, opposite a surface of the adhesive layer facing the base layer.
