(54) **Title:** RIDE SYSTEM WITH DYNAMIC RIDE VEHICLE CONFIGURATIONS

FIG. 1

(57) **Abstract:** A ride system includes a first ride vehicle having a first magnet exposed along a first exterior side of the first ride vehicle and a first additional magnet exposed along a first additional exterior side of the first ride vehicle. The ride system includes a second ride vehicle having a second magnet exposed along a second exterior side of the second ride vehicle and a second additional magnet exposed along a second additional exterior side of the second ride vehicle. The ride system includes a control system configured to control maneuvering of one or both of the first and second ride vehicles to: establish a coupling between the first magnet and the second magnet in a first configuration, establish a coupling between the first additional magnet and the second magnet in a second configuration, establish a coupling between the first magnet and the second additional magnet in a third configuration, establish a coupling between the first additional magnet and the second additional magnet in a fourth configuration.
