

ABSTRACT

The present invention relates to the technical field of artificial intelligence, and relates to a search processing method and apparatus, and a computer readable storage medium. The search processing method in the present invention comprises: receiving a question input by a user; and on the basis of the question, displaying an answer of the question and a plurality of answer videos related to the question in a search result page, wherein the answer is a sentence which is generated by machine understanding of the plurality of answer videos and described in natural language, and comprises description information of each answer video among the plurality of answer videos generated by machine understanding of the answer video.
