(54) Title: POWER MANAGEMENT SYSTEM FOR A NETWORK COMPUTER SYSTEM

(57) Abstract: A power state selection system and method are described to receive a representation of a network processing load associated with a plurality of network access devices, to select a power state based on the representation, and to assert a power state selection signal corresponding to the selected power state.

WO 2003/027817 A3

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
