(54) Title: SERVICE DATA PROCESSING METHOD AND DEVICE, AND SERVICE PROCESSING METHOD AND DEVICE

FIG. 3

(57) Abstract: First service data sent by at least one first blockchain node is received, where the first service data includes a first source address and a first destination address. Second service data is generated based on the first service data, where the second service data includes a second source address and a second destination address, the second source address including the first source address, and the second destination address including the first destination address. The second service data is sent to the first blockchain node, so that the first blockchain node checks the second service data. The second service data is processed when acknowledgement information sent by the first blockchain node is received.
