

## A MEDICAL HAND COVERING

### **ABSTRACT**

Disclosed herein is a medical hand covering for tightly enclosing a hand holding a medical instrument to prevent and/or minimize transmission of infectious agents upon examination. The medical hand covering may be prepared by a variety of methods, such as dipping and curing or welding and die cutting. The medical hand covering may have a variety of uses, such as minimizing transmission of infectious agents and reduce anxiety in patients via inclusion of a printed character on the medical hand covering. Also disclosed herein are methods for packaging, devices for dispensing, methods for dispensing, and kits encompassing the medical hand coverings described herein.
