CLAIMS

1. A hair care appliance comprising:

a body comprising a first end, a second end and an outer wall; ~~and~~

a handle comprising an outer wall and a wall disposed within the outer wall wherein, the outer wall of the body and the wall of the handle are formed as a single unit and wherein the handle comprises a primary fluid inlet disposed at and/or near the distal end of the handle from the body; and~~.~~

a primary fluid flow path flowing from the primary fluid inlet within the wall to the body, wherein the body comprises a primary fluid outlet for the primary fluid flow path and the primary fluid outlet is at the second end, and wherein the body comprises a duct extending within the outer wall of the body and the duct extends from the first end.

2. An appliance according to claim 1, wherein the outer wall of the handle extends about the wall and partially along the wall.

3. An appliance according to claim 1 or claim 2, wherein the outer wall of the handle extends about the wall for substantially the whole length of the wall.

4. An appliance according to any preceding claim, wherein the primary fluid inlet comprises at least one aperture extending around the outer wall.

5. An appliance according to any preceding claim, wherein the primary fluid inlet comprises at least one aperture extending along the outer wall.

6. An appliance according to any preceding claim, wherein the primary fluid inlet comprises at least one aperture extending across the outer wall.

~~7. An appliance according to any preceding claim, comprising a primary fluid flow path flowing from the primary fluid inlet within the wall to the body.~~

~~8~~7. An appliance according to claim ~~7~~1, wherein the handle comprises a fan unit wherein the fan unit draws fluid into the primary fluid flow path.

~~9~~8. A hair care appliance comprising:

a body comprising a first end, a second end and an outer wall~~;~~ wherein the second end of the body comprises a primary fluid outlet for the primary fluid flow path;

a handle comprising an outer wall and a wall disposed within the outer wall wherein, the outer wall of the body and the wall of the handle are formed as a single unit, and

a fan unit for drawing fluid into ~~the~~ a primary fluid flow path from a primary fluid inlet to a primary fluid outlet~~.~~

~~10. An appliance according to claim 9 wherein the handle comprises a fan unit.~~

~~11. An appliance according to any of claims 7 to 10, wherein the body comprises a primary fluid outlet for the primary fluid flow path.~~

~~12. An appliance according to claim 11, wherein the body comprises a first end and a second end and the primary fluid outlet is at the second end.~~

~~13~~9. An appliance according to claim ~~12~~8, wherein the body comprises a duct extending within the outer wall of the body and the duct extends from the first end.

~~14~~10. A hair care appliance comprising:

a body comprising an outer wall and having a first end and a second end; and

a handle comprising an outer wall and a wall disposed within the outer wall wherein, the outer wall of the body and the wall of the handle are formed as a single unit~~, and~~

wherein the body comprises a duct extending within the outer wall of the body and the duct extends from the first end and wherein the duct defines a fluid flow path from a fluid inlet into the appliance.

~~15~~11. An appliance according to claim 13 ~~or claim 14~~1, wherein the primary fluid flow path extends between the outer wall of the body and the duct.

~~16. An appliance according to any of claims 13 to 15, wherein the duct defines a fluid flow path from a fluid inlet into the appliance.~~

~~17~~12. An appliance according to claim ~~16~~11, wherein the fluid inlet is at the first end of the body.

~~18. An appliance according to claim 16 or claim 17, wherein the fluid flow path merges with the primary fluid flow path within the body.~~

~~19~~13. An appliance according to claim 17 ~~or claim 18~~2, wherein the primary fluid flow path surrounds the fluid flow path at the second end of the body.

~~20~~14. An appliance according to any of claims ~~13~~ 10 to ~~19~~13, wherein the duct is connected to the outer wall of the body by a side wall extending between the duct and the outer wall.

~~21~~15. An appliance according to claim ~~20~~14, wherein the side wall is angled to both the outer wall of the body and the duct.

~~22~~16. An appliance according to claim ~~20~~ 14 or claim ~~21~~15, wherein the side wall is disposed at the first end of the body.

~~23~~17. An appliance according to any of claims ~~20~~ 14 to ~~22~~16, wherein the duct and side wall are formed as a single unit.

~~24. An appliance according to any of claims 20 to 23, wherein the duct and side wall are formed from a plastic material.~~

~~25~~18. An appliance according to any of claims ~~20~~ 14 to ~~24~~17, wherein the side wall at least partially defines the fluid inlet.

~~26. An appliance according to any preceding claim, wherein the outer wall of the body and wall of the handle are made from a plastic material.~~

~~27. An appliance according to any preceding claim, wherein the outer wall of the handle is made from a different material to the wall of the handle and the outer wall of the body.~~

~~28~~19. An appliance according to any preceding claim, wherein the body comprises a heater.

~~29~~20. An appliance according to claim ~~28~~19, wherein the heater extends along the body.

~~30.~~21. An appliance according to claim ~~28~~ 19 or claim ~~29~~20, wherein the heater extends around the body.

~~31~~22. A hand held appliance comprising:

a body comprising an outer wall; and

a handle comprising an outer wall and a wall disposed within the outer wall wherein, the outer wall of the body and the wall of the handle are formed as a single unit ~~and~~ wherein the handle comprises a primary fluid inlet disposed at and/or near the distal end of the handle from the body and wherein the primary fluid inlet comprises at least one aperture extending along the outer wall.

~~32. An appliance according to claim 31, wherein the outer wall of the handle extends about the wall and partially along the wall.~~

~~33. An appliance according to claim 31 or 32, wherein the outer wall of the handle extends about the wall for substantially the whole length of the wall.~~

~~34. An appliance according to any of claims 31 to 33, wherein the primary fluid inlet comprises at least one aperture extending around the outer wall.~~

~~35. An appliance according to any of claims 31 to 34, wherein the primary fluid inlet comprises at least one aperture extending along the outer wall.~~

~~36. An appliance according to any of claims 31 to 35, wherein the primary fluid inlet comprises at least one aperture extending across the outer wall.~~

~~37. An appliance according to any of claims 31 to 36, comprising a primary fluid flow path flowing from the primary fluid inlet within the wall to the body.~~

~~38. An appliance according to claim 37, wherein the handle comprises a fan unit wherein the fan unit draws fluid into the primary fluid flow path.~~

~~39~~23. A hand held appliance comprising:

a body comprising an outer wall;

a handle comprising an outer wall and a wall disposed within the outer wall wherein, the outer wall of the body and the wall of the handle are formed as a single unit, and

a fan unit for drawing fluid into ~~the~~ ta primary fluid flow path from a primary fluid inlet to a primary fluid outlet wherein the body comprises a first end and a second end and the primary fluid outlet for the primary fluid flow path is at the second end.

~~40. An appliance according to claim 39 wherein the handle comprises a fan unit.~~

~~41. An appliance according to any of claims 37 to 40, wherein the body comprises a primary fluid outlet for the primary fluid flow path.~~

~~42. An appliance according to claim 41, wherein the body comprises a first end and a second end and the primary fluid outlet is at the second end.~~

~~43. An appliance according to claim 42, wherein the body comprises a duct extending within the outer wall of the body and the duct extends from the first end.~~

4424. A hand held appliance comprising:

a body comprising an outer wall and having a first end and a second end; and

a handle comprising an outer wall and a wall disposed within the outer wall wherein, the outer wall of the body and the wall of the handle are formed as a single unit and wherein the body comprises a duct extending within the outer wall of the body and the duct extends from the first end.

~~45. An appliance according to claim 43 or claim 44, wherein the primary fluid flow path extends between the outer wall of the body and the duct.~~

~~46. An appliance according to any of claims 43 to 45, wherein the duct defines a fluid flow path from a fluid inlet into the appliance.~~

~~47. An appliance according to claim 46, wherein the fluid inlet is at the first end of the body.~~

~~48. An appliance according to claim 46 or claim 47, wherein the fluid flow path merges with the primary fluid flow path within the body.~~

~~49. An appliance according to claim 46 or claim 47, wherein the primary fluid flow path surrounds the fluid flow path at the second end of the body.~~

~~50. An appliance according to any of claims 43 to 47, wherein the duct is connected to the outer wall of the body by a side wall extending between the duct and the outer wall.~~

~~51. An appliance according to claim 50, wherein the side wall is angled to both the outer wall of the body and the duct.~~

~~52. An appliance according to claim 50 or claim 51, wherein the side wall is disposed at the first end of the body.~~

~~53. An appliance according to any of claims 50 to 52, wherein the duct and side wall are formed as a single unit.~~

~~54. An appliance according to any of claims 50 to 53, wherein the duct and side wall are formed from a plastic material.~~

~~55. An appliance according to any of claims 50 to 54, wherein the side wall at least partially defines the fluid inlet.~~

~~56. An appliance according to any of claims 31 to 55, wherein the outer wall of the body and wall of the handle are made from a plastic material.~~

~~57. An appliance according to any of claims 31 to 56, wherein the outer wall of the handle is made from a different material to the wall of the handle and the outer wall of the body.~~

~~58. An appliance according to any of claims 31 to 57, wherein the body comprises a heater.~~

~~59. An appliance according to claim 58, wherein the heater extends along and around the body.~~

~~60~~25. An appliance according to any of claims 1 to ~~30~~ 21 wherein the appliance is a hairdryer.

~~61. An appliance as substantially herein described with reference to the drawings.~~
