ABSTRACT

SOLUTION-TYPE PHARMACEUTICAL COMPOSITION OF PHENOL DERIVATIVE, AND FORMULATION AND USE THEREOF

A solution-type pharmaceutical composition of a phenol derivative, and a formulation and use thereof. The pharmaceutical composition comprises the following components: an active ingredient, a humectant, a penetration enhancer, a chelating agent, a pH regulator, and a solvent; wherein the active ingredient is selected from at least one of a compound of formula (I) and a pharmaceutically acceptable salt thereof. The composition has good physical and chemical stability, is suitable for treating autoimmune inflammation, is particularly suitable for treating diseases described above with hair part onset, alleviates the problems of high medication difficulty and poor treatment effect of the hair part, and remarkably improves the medication compliance and life quality of patients.
