

**METHOD TO IMPROVE LIVE TRACKING ACCURACY OF DRIVER LOCATION ON
SUBSCRIBER APPLICATION**

5

The invention relates to a method to improve live tracking accuracy of driver locations on subscriber applications by increasing the frequency of driver ping performed during the booking status is On the Way for Pick-up, which is a few seconds after the driver receives the booking and the driver location is close to the pick-up location. The time duration and short distance is based on the configuration on the driver application.
