(54) Title: PORTABLE AUDIO ENHANCEMENT AND MEDIA PLAYER DEVICE

(57) Abstract: A portable audio enhancement and media player device and disclosed for enabling an electronic consumer product such as personal computer, mobile phone etc., to process and format media having different data formats like "mp3", "wav" etc. The portable device may be connected to an electronic consumer product via a connector like universal serial bus, firewire.etc. By connecting the portable device via one of the connector, the portable device provides the required processors for processing audio/video media data necessary to play such data formats and enable the electronic consumer product with sound card and media player functionality. The portable device also enables an electronic product to obtain an additional secondary functionality such as audio enhancement when connected to the host computer and also aid in processing data when connected to the host computer.
