Abstract

Field of Invention

This invention relates generally to safety of outdoor activities in public areas. For example, cyclists, skaters, or joggers could use this invention to alert others of their presence to prevent accidents in a convenient way with minimal interruption to what they are doing.

Brief Descriptions of drawings

Fig 1 How the device could be triggered by a hand raising gesture

Fig 1. One possible way which the device could be worn on a user's hand.

Fig 3. Alert is not triggered during walking or running
