(54) Title: DIGITIZATION OF PAYMENT CARDS FOR WEB 3.0 AND METAVERSE TRANSACTIONS

FIG. 1

(57) Abstract: Systems and techniques for digitization of payment cards for Web 3.0 ("Web3") and metaverse transactions are provided. The described systems and techniques allow for the use of non-fungible tokens (NFTs) to represent a payment token for making a payment inside a Web3 and Metaverse environment. Indeed, the described systems and techniques provide a financial NFT enabled representation of a payment card account as a token in a blockchain network, which can then be used to facilitate Web3 payments with real-time fiat to crypto exchanges.
