

**ANTI-AGING PRODUCT, ANTI-AGING PREPARATION, AND PRODUCTION
METHOD FOR SAME**

[ABSTRACT]

The present invention provides: a product that rejuvenates aged cells or induces resistance to SASP and thereby inhibits aging; and a food, a cosmetic, a pharmaceutical, or the like that includes the product. Provided are: an anti-aging product that has anti-aging activity and is produced from macrophages stimulated with lipopolysaccharide; and an anti-aging preparation such as a food, a cosmetic, a skincare preparation, a supplement, a quasi-pharmaceutical, or a pharmaceutical that includes the anti-aging product. Also provided is a production method for the anti-aging product.
