(54) Title: HYDROMASSAGE APPARATUS

(57) Abstract: Body treatment apparatus via hydromassage. It comprises a flattened base (3) for the rest and support of the user, and an articulated covering body (4) with opening and closing means that, with the flattened base (3), define a housing for the positioning of the user in its interior during the treatment, a footing (1) on the ground and a support frame (2) that is characterized in that in the inner part of the body of the apparatus includes a hitting device constituted by a plurality of liquid sprinkler mechanisms (11), placed in at least two horizontal and parallel flatbars (9, 10) or with a certain degree parallelism, equipped with alternative movements in opposite directions one in respect to the other and driven by means of devices (24 to 27) with speed regulation and moving stroke regulation.
