

Abstract

METHOD FOR PRODUCING INSTANT NOODLES

[Abstract]

[Problem to be Solved]

- 5 The present invention reduces usage of sodium chloride by adding magnesium chloride, and overcomes problems occurring in using magnesium chloride.

[Solution]

- 10 The present inventors have found that when magnesium chloride is added instead of sodium chloride to noodle strings and a reducing sugar is further added, preferable well-cooked feeling and appearance are imparted in subsequent production process for instant noodles, and thus, the present invention was accomplished. Specifically, the present invention relates to noodle strings for use in production of instant noodles, the noodle strings containing a raw material powder, magnesium chloride and a reducing sugar.
