

**ABSTRACT****A DIFFERENTIATED CASINO GAME KNOWN AS "SUPER COLOR SIC BO"**

5 The present invention relates to a differentiated casino game that has different colours for the numbers on three coloured dices that are required for the game. In particular, in a preferred embodiment, the present invention relates to a new method of playing the game using three (3) coloured dices, where each dice has twelve (12) faces with specific numbers, with specific coloured backgrounds. The present invention is a variant of the

10 Chinese casino game that has various names such as Sic Bo, Tai Sai, Dai Siu, Big and Small, Hi-Lo. There is also the English variant of the Chinese casino game known as Grand Hazard and Chuck-a-luck. The game may also be played at a table in different venues including but not limited to the casinos and other venues and also virtual tables through the internet including social network platforms that may be accessed via the

15 internet or other communication networks with third parties. The game is of both entertainment and educational value. In addition, the game may also be played in a variety of ways, through information storage devices including but not limited to CDs (C-ROMs), video compact disc (video discs), interactive CDs (CD-Is), stand-alone machines similar to slot machines and on wireless devices including but not limited to mobile

20 phones. The present invention relates to a differentiated casino game for playing with dices that have different colours for numbers and also a variable method for operating an online gaming environment for conducting the differentiated game through various communications media currently available in the market.
