ABSTRACT

Disclosed are a method for reporting an SRS power headroom, a terminal device, and a computer storage medium. The method comprises: performing calculation to obtain predicted SRS transmit powers for one or more SRS resources included in a target SRS resource set, wherein the target SRS resource set is an SRS resource set on a target carrier or on a target bandwidth part (BWP); performing, according to the anticipated SRS transmit powers for the one or more SRS resources, calculation to obtain a power headroom (PH) for the target SRS resource set; and reporting the PH for the target SRS resource set obtained by calculation.
